Where a payment arrives

Connecting Tonkeeper saves the TON address only.
SOL does not show up in the TON balance.

TON and TON USDT

The Tonkeeper address you connect. It starts with UQ or EQ.

Solana

Paste the Solana address. In Keeper: Receive, then Solana.

TRON USDT

Paste a T address, 34 characters. A 5 USDT invoice may show as 5.0001.

EVM

Paste a 0x address for Ethereum, Base, Polygon, Arbitrum, or BNB Chain.

Telegram sign-in

No password

WHAT IT DOES FOR YOU

The bot and the Mini App know it is you from Telegram. You do not create a separate password for that path.

HOW YOU USE IT

- 1 Open @AuraPayGlobalBot.
- 2 Tap Start.
- 3 Open AuraPay Dashboard. Telegram signs you in.

WHERE TO OPEN IT

Bot and Mini App

KEEP IN MIND

This path has no extra password.
Telegram is the login.

WHAT YOU WILL SEE

- 1 The bot knows it is you after Start.
- 2 AuraPay Dashboard opens the Mini App.
- 3 There is no second password on this path.

NEXT 02 Email sign-in

Email sign-in

Your login

WHAT IT DOES FOR YOU

A website account with your email and a password. This is how you open the web gateway in a browser.

HOW YOU USE IT

- 1 Open aurapayglobal.com/login.
- 2 Create an account, or sign in with the email you already used.
- 3 Forgot the password? Use Forgot password on that same page.

WHERE TO OPEN IT

aurapayglobal.com/login

KEEP IN MIND

The password is only for the website.

WHAT YOU WILL SEE

- 1 The page is aurapayglobal.com/login.
- 2 Forgot password is on that same page.
- 3 This login is only for the website.

NEXT 03 Google sign-in

Google sign-in

Your Google account

WHAT IT DOES FOR YOU

Sign in on the website with Google. You can join that login to the Telegram bot so both see one account.

HOW YOU USE IT

- 1 On the login page, choose Google and approve the prompt.
- 2 You land on the web gateway.
- 3 In the bot, /connect uses the code from the website when you want the bot and the site on one account.

WHERE TO OPEN IT

Website, then /connect

KEEP IN MIND

Use /connect when you want the Google login and the bot on one account.

WHAT YOU WILL SEE

- 1 Google asks you to approve the prompt.
- 2 You land on the web gateway.
- 3 /connect joins that login to the bot.

NEXT 04 Connect Tonkeeper

Connect Tonkeeper

TON address only

WHAT IT DOES FOR YOU

Connecting Tonkeeper saves your TON address, the one that starts with UQ or EQ. TON and TON USDT use that address. Solana, TRON, and EVM are separate addresses you paste later.

HOW YOU USE IT

- 1 On the website or in the Mini App, tap Connect.
- 2 Approve the request in Tonkeeper.
- 3 Check the address shown. AuraPay never asks for your seed phrase.

WHERE TO OPEN IT

Mini App and website

KEEP IN MIND

AuraPay never sees your seed phrase.
Connect saves the TON address only.

WHAT YOU WILL SEE

- 1 The saved address starts with UQ or EQ.
- 2 TON and TON USDT use that address.
- 3 Solana, TRON, and EVM stay empty until you paste them.

NEXT 05 Send TON and USDT

Send TON and USDT

About 1% on TON

WHAT IT DOES FOR YOU

Pay a TON address. You sign the transfer in Tonkeeper. TON sends are about 1%. A USDT send has no platform percent. You pay about 0.05 TON in network gas.

HOW YOU USE IT

- 1 Open Send in the bot menu, or Send on the website.
- 2 Enter the amount and a UQ or EQ address.
- 3 Confirm in Tonkeeper. You get an AP- receipt when it settles.

WHERE TO OPEN IT

Send in the bot or on the web

KEEP IN MIND

You sign the transfer in Tonkeeper.
AuraPay cannot send from your wallet on its own.

WHAT YOU WILL SEE

- 1 A TON send is about 1%.
- 2 A USDT send is 0%, plus about 0.05 TON in gas.
- 3 The receipt starts with AP-.

NEXT 06 Receive

Receive

0%

WHAT IT DOES FOR YOU

Share your TON address or a QR. Inbound TON and TON USDT land in the Tonkeeper address you connected. This does not receive Solana or TRON.

HOW YOU USE IT

- 1 Open Receive.
- 2 Copy the address or show the QR.
- 3 The sender pays that address. Your balance updates after the chain confirms.

WHERE TO OPEN IT

Receive in the bot or Mini App

KEEP IN MIND

This address and QR are for TON. Solana, TRON, and EVM use their own addresses.

WHAT YOU WILL SEE

- 1 You get your TON address and a QR.
- 2 Inbound TON and TON USDT land in Tonkeeper.
- 3 This screen does not receive Solana or TRON.

[NEXT 07 Payment links](#)

Payment links

0% invoice

WHAT IT DOES FOR YOU

A checkout link for a set amount. The buyer pays the address saved for that chain. AuraPay does not hold the payment.

HOW YOU USE IT

- 1 In the bot, send /paylink and the amount, or create a link on the website.
- 2 Share the link or the QR.
- 3 The reference looks like PR-. You see it move to Paid when the chain confirms.

WHERE TO OPEN IT

/paylink and Pay links

KEEP IN MIND

The buyer pays the address saved for that chain. AuraPay does not hold the payment.

WHAT YOU WILL SEE

- 1 The reference looks like PR-.
- 2 The buyer pays the address saved for that chain.
- 3 The invoice fee is 0%.

NEXT 08 Hosted checkout

Hosted checkout

0%

WHAT IT DOES FOR YOU

The page the buyer opens. They pay from their own wallet into the address you saved for that chain.

HOW YOU USE IT

- 1 Send the buyer the checkout link.
- 2 They pay on the chain shown on the page.
- 3 You get a PR- receipt in the bot, and the invoice shows Paid.

WHERE TO OPEN IT

pay.aurapayglobal.com

KEEP IN MIND

The link the buyer opens is checkoutUrl, on pay.aurapayglobal.com.

WHAT YOU WILL SEE

- 1 The buyer opens pay.aurapayglobal.com.
- 2 The link you send is checkoutUrl.
- 3 The invoice shows Paid when the chain confirms.

NEXT 09 Instant Swap

Instant Swap

0.5%

WHAT IT DOES FOR YOU

Change TON to USDT, or USDT to TON, inside AuraPay. The quote includes the 0.5% fee. You confirm in Tonkeeper.

HOW YOU USE IT

- 1 Open Swap in the Mini App or on the website.
- 2 Check the amount you will receive.
- 3 Confirm in Tonkeeper. If the phone stays quiet, tap Open in Tonkeeper Mobile.

WHERE TO OPEN IT

Swap in the Mini App

KEEP IN MIND

The 0.5% fee is already inside the quote you confirm.

WHAT YOU WILL SEE

- 1 The quote already includes the 0.5% fee.
- 2 You confirm the swap in Tonkeeper.
- 3 If the phone stays quiet, tap Open in Tonkeeper Mobile.

NEXT 10 Telegram Stars

Telegram Stars

1% on credit

WHAT IT DOES FOR YOU

See Stars you bought in Telegram, then withdraw them as TON to your linked wallet. Clearing usually takes 3 to 5 minutes. The message to look for is Stars withdrawal cleared.

HOW YOU USE IT

- 1 Send /stars and read the balance.
- 2 Send /withdraw. The minimum is usually 100 Stars.
- 3 Wait for Stars withdrawal cleared and an AP- code.

WHERE TO OPEN IT

/stars and /withdraw

KEEP IN MIND

The message to wait for is Stars withdrawal cleared. That is the payout.

WHAT YOU WILL SEE

- 1 /stars shows the Stars you bought.
- 2 /withdraw usually starts at 100 Stars.
- 3 Look for Stars withdrawal cleared, usually in 3 to 5 minutes.

NEXT 11 Paywalls

Paywalls

0% Invoice

WHAT IT DOES FOR YOU

Sell access to a Telegram channel, a secret link, or a file. The buyer pays, then access follows the period you set.

HOW YOU USE IT

- 1 Open Paywalls on the website, or send /paywall.
- 2 Set the price and what the buyer unlocks.
- 3 Share it. A buyer renews with /renew and a PW- code.

WHERE TO OPEN IT

/paywall and the website

KEEP IN MIND

The reference starts with PW-. A buyer renews with /renew.

WHAT YOU WILL SEE

- 1 The reference starts with PW-.
- 2 A buyer renews with /renew and that code.
- 3 The invoice fee is 0%.

NEXT 12 Vouchers

Vouchers

[Redeem a code](#)

WHAT IT DOES FOR YOU

A code you give someone for access, or for a payout. A TON payout uses the same treasury path as a Stars withdrawal.

HOW YOU USE IT

- 1 Create the voucher from your payroll tools.
- 2 Send the code to the buyer.
- 3 Send /vouchers when you want the counts.

WHERE TO OPEN IT

/vouchers

KEEP IN MIND

A TON payout from a voucher uses the same path as a Stars withdrawal.

WHAT YOU WILL SEE

- 1 You create the code and send it.
- 2 /vouchers shows the counts.
- 3 A TON payout uses the same path as a Stars withdrawal.

[NEXT 13 Merchant API](#)

Merchant API

0% Invoice

WHAT IT DOES FOR YOU

Your own site creates the invoice. A new invoice returns 201. The same external id returns 200. When the chain confirms, your server receives payment.confirmed.

HOW YOU USE IT

- 1 On the website, open Merchant API and create a key. Use the test key first.
- 2 Send POST /api/v1/invoices with Authorization: Bearer and your key.
- 3 Give the buyer checkoutUrl. Check the header X-AuraPay-Signature on the webhook.

WHERE TO OPEN IT

api.aurapayglobal.com

KEEP IN MIND

A new invoice is 201. The same external id returns 200. The webhook header is X-AuraPay-Signature.

WHAT YOU WILL SEE

- 1 A new invoice returns 201.
- 2 The same external id returns 200.
- 3 The event is payment.confirmed, signed with X-AuraPay-Signature.

NEXT 14 Merchant alerts and export

Merchant alerts and export

Included

WHAT IT DOES FOR YOU

A Telegram alert when you are paid, a CSV of activity, and a snippet for your site. Choosing USDT shows a swap button. AuraPay does not swap the coins for you.

HOW YOU USE IT

- 1 Turn on alerts where you manage pay links.
- 2 Export the CSV from reports when you want a file.
- 3 Paste the snippet if you want a pay button on your site.

WHERE TO OPEN IT

Pay links and reports

KEEP IN MIND

Choosing USDT shows a swap button.
AuraPay does not swap the coins for you.

WHAT YOU WILL SEE

- 1 Telegram alerts you when you are paid.
- 2 Reports can export a CSV.
- 3 The USDT choice is a button. AuraPay does not swap for you.

NEXT 15 Payout addresses

Payout addresses

One address per chain

WHAT IT DOES FOR YOU

Each chain pays the address you save for it. Connecting Tonkeeper does not fill Solana, TRON, or EVM. A Solana payment shows on the Solana balance, not in the TON balance.

HOW YOU USE IT

- 1 Open Payouts or Networks and find the address fields.
- 2 Paste a T address for TRON, and a 0x address for EVM.
- 3 In Keeper, open Receive, choose Solana, and paste that address. Then save.

WHERE TO OPEN IT

Payouts or Networks

KEEP IN MIND

For Solana, copy the address in Keeper under Receive, then Solana. Do not paste a UQ or EQ address there.

WHAT YOU WILL SEE

- 1 TRON is a T address, 34 characters.
- 2 EVM is a 0x address.
- 3 Solana is the address in Keeper under Receive, then Solana.

NEXT 16 Shop

Shop

0% checkout

WHAT IT DOES FOR YOU

A catalog and a cart. The buyer pays with a checkout invoice. The hosted checkout fee is 0%.

HOW YOU USE IT

- 1 Add a product with /addproduct, or from the shop on the website.
- 2 Buyers browse, add to the cart, and check out.
- 3 You read orders from the shop.

WHERE TO OPEN IT

/products and the website

KEEP IN MIND

A product checkout is a hosted invoice.
The fee on that invoice is 0%.

WHAT YOU WILL SEE

- 1 Add a product with /addproduct.
- 2 The buyer pays a hosted checkout.
- 3 The fee on that invoice is 0%.

NEXT 17 Cheques

Cheques

Funded with Stars

WHAT IT DOES FOR YOU

A claim drop funded with Stars. You share a code. Someone claims it in the bot. The code looks like CHQ-.

HOW YOU USE IT

- 1 Send /cheque and follow the prompts.
- 2 Share the claim with the person who should receive it.
- 3 They claim it in @AuraPayGlobalBot.

WHERE TO OPEN IT

/cheque

KEEP IN MIND

The claim code starts with CHQ-. The drop is funded with Stars.

WHAT YOU WILL SEE

- 1 The claim code starts with CHQ-.
- 2 The drop is funded with Stars.
- 3 The other person claims it in the bot.

NEXT 18 Giveaways

Giveaways

Host pays the prize

WHAT IT DOES FOR YOU

A TON or USDT prize for a community. The prize comes from the host wallet, not from AuraPay custody.

HOW YOU USE IT

- 1 Send /giveaways to see what is open.
- 2 Send /join to enter.
- 3 A host creates the round from the giveaway tools. Winners are paid from the host wallet.

WHERE TO OPEN IT

/giveaways and /join

KEEP IN MIND

The prize leaves the host wallet.
AuraPay does not hold it.

WHAT YOU WILL SEE

- 1 /giveaways lists open rounds.
- 2 /join enters a round.
- 3 The prize leaves the host wallet.

NEXT 19 Referral

Referral

0.1% of TON sends

WHAT IT DOES FOR YOU

People who join with your link earn you 0.1% of their TON sends. You can withdraw the reward from 0.1 TON.

HOW YOU USE IT

- 1 Send /refer and copy your link.
- 2 Share it.
- 3 Send /refer-balance to see the reward, then /refer-withdraw when you want it paid.

WHERE TO OPEN IT

/refer

KEEP IN MIND

The reward is 0.1% of referred TON sends. You can withdraw it from 0.1 TON.

WHAT YOU WILL SEE

- 1 /refer gives you the link to share.
- 2 You earn 0.1% of their TON sends.
- 3 /refer-withdraw pays the reward from 0.1 TON.

NEXT 20 Help assistant

Help assistant

[In the product](#)

WHAT IT DOES FOR YOU

The assistant in the bot, the Mini App, and the website. It answers AuraPay questions. It cannot move money out of your wallet. A human ticket opens when you ask for a person, report stolen funds, or a payment is unmatched or expired.

HOW YOU USE IT

- 1 Send /help for the menu, or /ask to talk.
- 2 In the Mini App, open Help.
- 3 If you are asking about one payment, paste the AP- or PR- code.

WHERE TO OPEN IT

/help, /ask, and the Mini App

KEEP IN MIND

A human ticket opens when you ask for a person, report stolen funds, or a payment is unmatched or expired.

WHAT YOU WILL SEE

- 1 /help opens the menu. /ask starts a chat.
- 2 Paste an AP- or PR- code for one payment.
- 3 A ticket opens for a person, stolen funds, or an unmatched or expired payment.

[NEXT 21 Admin console](#)

Admin console

Staff only

WHAT IT DOES FOR YOU

An operations screen for allowlisted AuraPay staff. It shows what moved. It cannot take coins from your Tonkeeper, Solana, TRON, or EVM wallet.

HOW YOU USE IT

- 1 This is not a customer screen.
- 2 Staff open /admin on the website, or /admin in the bot.
- 3 The account must already be allowlisted.

WHERE TO OPEN IT

/admin

KEEP IN MIND

Staff can see what moved. They cannot sign a transfer from your wallet.

WHAT YOU WILL SEE

- 1 Only an allowlisted staff account can open it.
- 2 The screen shows what moved.
- 3 Staff cannot sign a transfer from your wallet.

NEXT 22 Status

Status

Public

WHAT IT DOES FOR YOU

A public page that says whether AuraPay is up. Use it before you assume a payment failed.

HOW YOU USE IT

- 1 Open status.aurapayglobal.com.
- 2 Read the current state.
- 3 If your payment still looks stuck, ask in [/ask](#) and include the reference code.

WHERE TO OPEN IT

status.aurapayglobal.com

KEEP IN MIND

Read status before you treat a slow payment as failed.

WHAT YOU WILL SEE

- 1 Open status.aurapayglobal.com.
- 2 No login is required.
- 3 If a payment still looks stuck, ask in [/ask](#) with the reference.

NEXT 23 Card on-ramp

Card on-ramp

Off until enabled

WHAT IT DOES FOR YOU

A way to buy crypto with a card through Transak. It stays off until the keys are turned on. It is not a way to pull crypto out of a wallet you already control.

HOW YOU USE IT

- 1 Look for Buy with card on the website.
- 2 If it is not there, the on-ramp is off.
- 3 Use Send, Receive, or a payment link instead.

WHERE TO OPEN IT

Website, when Transak is on

KEEP IN MIND

If Buy with card is missing, the on-ramp is off. It is not a way to pull crypto you already hold.

WHAT YOU WILL SEE

- 1 Look for Buy with card on the website.
- 2 If it is missing, the on-ramp is off.
- 3 It does not pull crypto you already hold.

NEXT Fees and help

Keep this page

Hosted invoice, pay link, shop	0%
Send TON	about 1%
Send USDT	0%, plus TON gas
Swap	0.5%
Stars purchase credit	1%
Referral on TON sends	0.1%

YOUR WALLET

You sign every transfer in your own wallet.

AuraPay cannot take coins from Tonkeeper, Solana, TRON, or EVM.

HELP

Send /help or /ask in @AuraPayGlobalBot.

A person is called when you ask, report stolen funds, or a payment is unmatched or expired.

support@aurapayglobal.com
